

## CLAIMS

1. Method of reducing the cross-talk between a data signal (HF) and an input push-pull signal (PP), for generating an output push-pull signal (IPP), said method comprising :
  - a convolution step for convoluting said data signal (HF) with a filter (F), for  
5 generating a first intermediary signal,
  - a multiplication step for multiplying said first intermediary signal to an adaptive scaling factor ( $\alpha$ ), for generating a second intermediary signal,
  - a subtracting step for subtracting said second intermediary signal to said input  
10 push-pull signal (PP), for generating said output push-pull signal (IPP).
2. Method as claimed in claim 1 where said adaptive scaling factor ( $\alpha$ ) is defined so as to minimize a cost function (J) that indicates the amount of data to push-pull cross-talk.
- 15 3. Method as claimed in claim 1 where said adaptive scaling factor ( $\alpha$ ) is derived from a look-up table (LUT) indexed with signal-to-noise ratio values of the push-pull signal (PP).
4. Method as claimed in claim 2 or 3 comprising sampling steps (SRC1, SRC2) for  
20 sampling said data signal (HF) and said input push-pull signal (PP) at a frequency ( $f_c$ ) lower than the channel bit rate ( $f_b$ ) of the data signal (HF).
5. Method as claimed in claim 4 where the filter (F) is defined by [1 0 -1].
- 25 6. Device for reducing the cross-talk between a data signal (HF) and an input push-pull signal (PP), for generating an output push-pull signal (IPP), said method comprising :
  - convolution means for convoluting said data signal (HF) with a filter (F), for  
generating a first intermediary signal,

- multiplication means for multiplying said first intermediary signal to an adaptive scaling factor ( $\alpha$ ), for generating a second intermediary signal,
- subtracting means for subtracting said second intermediary signal to said input push-pull signal (PP), for generating said output push-pull signal (IPP).

5

7. A computer program comprising code instructions for implementing the steps of the method as claimed in anyone of claims 1 to 5.
